# ***CONFORMITY REQUIREMENTS AND FINDINGS***

---

## ***PREFACE***

The federally required conformity analyses and findings for the 2013 Federal Transportation Improvement Program (FTIP) are set forth in the following sections. These analyses also update the 2012-2035 Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). All transportation and air quality conformity analyses in this document are in compliance with applicable federal and state laws, including conformity and transportation planning regulations. This Technical Appendix contains three sections that specifically address the conformity analyses required for federal approval:

- Section I summarizes the conformity requirements and findings.
- Section II provides modeling methodologies and assumptions and results of the regional emissions analyses for the 2013 FTIP.
- Section III reports on the timely implementation of Transportation Control Measures (TCMs) and describes the implementation status of all applicable TCMs in the SCAG region.

## ***STATE AND FEDERAL REQUIREMENTS***

SCAG, the Metropolitan Planning Organization (MPO) for Southern California, is mandated to comply with federal and state transportation and air quality regulations. Federal transportation regulations authorize federal funding for highway, highway safety, transit, and other surface transportation programs. The Federal Clean Air Act (CAA) establishes air quality standards and planning requirements for various criteria air pollutants.

### **Regional Transportation Plan and Federal Transportation Improvement Program**

Federal transportation law requires that SCAG develop a RTP for a 20-year minimum period. Additionally, SCAG must develop a FTIP that allocates funds over a four-year period to implement the RTP. In the federal non-attainment or maintenance areas, the RTP and FTIP must comply with the transportation conformity requirements of the EPA Transportation Conformity Regulations.

The biennial FTIP update is produced on an even-year cycle, and is consistent with the State Transportation Improvement Program (STIP) cycle.

## **Federal Non-Attainment and Maintenance Areas**

The U.S. Environmental Protection Agency (EPA) may make a federal “non-attainment area” designation to any area that has not met CAA health standards for one or more pollutants. A non-attainment area designation may require additional air-quality controls for transportation plans, programs, and projects. The California Air Resource Board (ARB) recommends the federal non-attainment area boundaries to EPA for final designations. Subsequently, the EPA finalizes and defines the boundaries of the federally designated non-attainment areas for each criteria pollutant.

A maintenance area is any geographic region of the United States previously designated nonattainment pursuant to the CAA Amendments of 1990 and subsequently redesignated to attainment subject to the requirement to develop a maintenance plan under section 175A of the CAA, as amended.

## **State Implementation Plans (SIPs)**

To comply with the CAA in achieving the National Ambient Air Quality Standards (NAAQS), the ARB develops SIPs for federal non-attainment and maintenance areas. In California, SIP development is a joint effort of the local air agencies and the ARB working with federal, state, and local agencies (including the MPOs). Local air quality management plans (AQMPs) are prepared in response to federal and state requirements.

In California, all SIPs have to go through three steps: air district action, ARB action, and finally EPA action. Each air district submits its respective AQMPs/SIPs to the ARB. The ARB is the official state agency that submits the SIPs to EPA for all federal non-attainment and maintenance areas in California.

The SIP includes two important components relative to transportation and air quality conformity requirements – emissions budgets (for all criteria pollutant SIPs) and TCMs (for ozone and CO SIPs only). Emissions budgets set an upper limit which transportation activities (motor vehicles also known as on-road mobile sources) are permitted to emit. TCMs, required for serious and above Ozone non-attainment areas and serious CO non-attainment areas, are strategies to reduce emissions from on-road mobile sources. The 2012-2035 RTP/SCS and 2013 FTIP must conform to the applicable SIPs [i.e., emissions budgets and TCMs] in the SCAG region.

## **Federal Transportation Conformity Rule**

Transportation conformity is required under CAA section 176(c) to ensure that federally supported highway and transit project activities “conform to” the purpose of the SIP. Conformity currently applies to areas that are designated non-attainment, and those re-designated to attainment after 1990, maintenance areas, with plans developed for the specific transportation-related criteria pollutants. Conformity for the purpose of the SIP means that transportation activities will not cause new air quality violations, worsen existing violations, or delay timely attainment of the relevant NAAQS. The transportation conformity regulation is found in 40 CFR part 93 and provisions related to conformity SIPs are found in 40 CFR 51.390.

## ***CLEAN AIR ACT DESIGNATIONS IN THE SCAG REGION***

Four criteria air pollutants are subject to transportation conformity for the 2012-2035 RTP/SCS and 2013 FTIP:

- Carbon Monoxide (CO) - a product of automobile exhaust. CO reduces the flow of oxygen in the bloodstream and is particularly dangerous to persons with heart disease.
- Nitrogen Dioxide (NO<sub>2</sub>) - created under the high pressure and temperature conditions in internal combustion engines. It impacts the respiratory system and degrades air visibility due to its brownish color.
- Ozone - formed by the reaction between volatile organic compounds (VOC) and oxides of nitrogen (NO<sub>x</sub>) in the presence of sunlight. Ozone negatively impacts the respiratory system.
- Particulate Matter (PM<sub>10</sub> and PM<sub>2.5</sub>) - extremely small particles and liquid droplets associated with dust, soot and combustion products. Particulate pollution has been linked to significant health problems, including aggravated asthma, increases in adverse effects on respiratory systems, chronic bronchitis, decreased lung function, and premature death.

### **Air Basins and Air Districts in the SCAG Region**

SCAG is a six-county region that contains four air basins administered by five air districts:

- The South Coast Air Basin (SCAB) covers the urbanized portions of Los Angeles, Riverside, and San Bernardino counties as well as the entire County of Orange and is within the jurisdiction of the South Coast Air Quality Management District (SCAQMD).
- The Ventura County portion of the South Central Coast Air Basin (SCCAB) covers Ventura County and is within the jurisdiction of the Ventura County Air Pollution Control District (VCAPCD).
- The Mojave Desert Air Basin (MDAB) covers the desert portions of Los Angeles, Riverside, and San Bernardino counties. A small portion of this air basin is in Kern County and outside of the SCAG region. The SCAG portion of this air basin is under the jurisdiction of three air districts:
  - The Mojave Desert Air Quality Management District (MDAQMD) administers portions of the MDAB situated in San Bernardino County and eastern Riverside County. The Riverside County portion is known as the Palo Verde Valley Area.
  - The SCAQMD administers the portion of MDAB in Riverside County situated between the Salton Sea Air Basin (SSAB) and the Palo Verde Valley Area.
  - The Antelope Valley Air Quality Management District (AVAQMD) administers the Los Angeles County portion of the MDAB.
- The Salton Sea Air Basin (SSAB) covers all of Imperial County and the eastern portion of Riverside County (excluding the MDAB portion). This air basin is under jurisdiction of two air districts:
  - The Imperial County Air Pollution Control District (ICAPCD) administers the Imperial County portion of the SSAB.
  - The SCAQMD administers the Riverside County portion of the SSAB situated between the SCAB and the MDAB.

## **Non-Attainment / Maintenance Areas in the SCAG Region**

The federal non-attainment/maintenance areas in the SCAG region are:

- Ventura County Portion of SCCAB – non-attainment area for 2008 8-hour Ozone
- SCAB – non-attainment or maintenance area for: 2011 CO; 2010 NO<sub>2</sub>; 2006 PM<sub>2.5</sub>; 1997 PM<sub>10</sub>; and 2008 8-hour Ozone
- Western MDAB (Antelope Valley portion of Los Angeles County and San Bernardino County portion of MDAB excluding Searles Valley) – non-attainment area for 2008 8-hour Ozone
- San Bernardino County portion of MDAB:
  - Searles Valley – non-attainment for 1997 PM<sub>10</sub>
  - San Bernardino County (excluding the Searles Valley area) – non-attainment area for 1997 PM<sub>10</sub>
- Riverside County Portion of SSAB (Coachella Valley) – non-attainment area for: 1997 PM<sub>10</sub> and 2008 8-hour Ozone
- Imperial County Portion of SSAB – non-attainment for 2008 8-hour Ozone, 2006 PM<sub>2.5</sub>, and 1997 PM<sub>10</sub>

The boundaries of the air basins, air districts, and non-attainment and maintenance areas are illustrated in Exhibit A at the end of this section.

## **Applicable Emissions Budgets in the SCAG Region**

For the 2012-2035 RTP/SCS conformity determination, the applicable emissions budgets are established in the SIPs as described below:

- Ventura County Portion of SCCAB
  - 2008 8-Hour Ozone Early Progress Plan
- SCAB
  - 2007 Ozone SIP (using budgets deemed adequate by U.S. EPA April 2012)
  - 2007 PM<sub>2.5</sub> SIP (using budgets found adequate by EPA November 2011)
  - 2007 CO SIP (Maintenance Plan)
  - 2007 NO<sub>2</sub> SIP (Maintenance Plan)
  - 2003 PM<sub>10</sub> SIP
- Riverside County Portion of SSAB (Coachella Valley)
  - 2008 8-Hour Ozone Early Progress Plan
  - 2003 PM<sub>10</sub> SIP
- Western MDAB (Antelope Valley and portion of Los Angeles County and San Bernardino County portion of MDAB excluding Searles Valley)
  - 2008 8-Hour Ozone Early Progress Plan
- Imperial County Portion of SSAB (Ozone)
  - 2008 8-Hour Ozone Early Progress Plan

## **SIP Status in Other Areas of the SCAG Region**

In absence of the applicable emissions budgets for conformity, SCAG has to conduct interim emissions tests for regional emissions analysis of the 2012-2035 RTP/SCS. At the present time, there is no federally approved SIP for the following areas.

- San Bernardino County Portion of MDAB (PM<sub>10</sub>)
- Searles Valley Portion of MDAB (PM<sub>10</sub>)
- Imperial County Portion of SSAB (PM<sub>10</sub> and PM<sub>2.5</sub>)

## **Applicable TCMs**

The SIP documents for the applicable TCMs in the SCAG region are listed below:

- SCAB – The TCM categories established in the 2007 Ozone AQMP/SIP functions as the applicable TCM categories for the conformity finding (timely implementation of TCM analysis). The TCM categories in the 2007 AQMP/SIP are consistent with TCM categories in the 1997 (as amended in 1999) and 2003 Ozone AQMPs/SIPs as well as the TCM01 categories listed in the 1994 Ozone AQMP/SIP.
- The Ventura County portion of SCCAB – The TCM strategies incorporated in the 1994 (as amended in 1995) Ozone AQMP/SIP function as the applicable TCMs for conformity finding.

It should be noted that while the 1-hour Ozone standard has been revoked and replaced with an 8-hour Ozone standard, the TCMs in the 1-hour Ozone SIPs remain applicable.

There are no applicable TCMs in any other federal non-attainment or maintenance areas in the SCAG region. For more information on TCMs and timely implementation of the TCMs, see Section III of this document.

## ***CONFORMITY STATUS OF CURRENT RTP AND FTIP***

The FHWA and FTA approved the conformity determination for the 2011 FTIP and the 2012-2035 RTP/SCS on June 4, 2012 for the following non-attainment and maintenance areas:

- SCCAB (Ventura County portion) - Ozone
- SCAB - Ozone, PM<sub>10</sub>, PM<sub>2.5</sub>, CO, NO<sub>2</sub>
- Western MDAB (Antelope Valley and San Bernardino County portion excluding Searles Valley) - Ozone
- MDAB (San Bernardino County and Searles Valley portion) - PM<sub>10</sub>
- SSAB (Coachella Valley portion) - Ozone, PM<sub>10</sub>
- SSAB (Imperial County portion) – Ozone, PM<sub>10</sub>, PM<sub>2.5</sub>

## ***CONFORMITY TESTS AND FINDINGS***

Under the U.S. DOT Metropolitan Planning Regulations and EPA's Transportation Conformity Regulations, SCAG's 2013 FTIP needs to pass five tests:

- ✓ Consistency with SCAG's RTP  
(23 CFR, Section 450.324 of the U.S. DOT Metropolitan Planning Regulations)
- ✓ Regional Emission Analysis  
(40 CFR, Sections 93.109, 93.110, 93.118, and 93.119)
- ✓ Timely Implementation of TCMs Analysis  
(40 CFR, Section 93.113)
- ✓ Financial Constraint Analysis  
(40 CFR, Section 93.108 and 23 CFR, Section 450.324)
- ✓ Interagency Consultation and Public Involvement Analysis  
(40 CFR, Sections 93.105 and 93.112 and 23 CFR, Section 450.324)

SCAG has made the following conformity findings for the 2013 FTIP under the required federal tests:

- ✓ **Consistency with 2012-2035 RTP/SCS Test**  
Finding: SCAG's 2013 FTIP (project listing) is consistent with the 2012-2035 RTP/SCS (policies, programs, and projects).
- ✓ **Regional Emissions Tests**  
These findings are based on the regional emissions test analyses shown in Tables 13 -26 in Section II of this Technical Appendix.

Finding: The regional emissions analyses for the 2013 FTIP update the regional emissions analyses for the 2011 FTIP as previously amended and the 2012-2035 RTP/SCS.

Finding: The 2013 FTIP regional emissions analysis for PM<sub>2.5</sub> and its precursors meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in the SCAB.

Finding: The 2013 FTIP regional emissions for the Ozone precursors meet all applicable emission budget tests for all milestone, attainment, and planning horizon years for the SCAB, SCCAB (Ventura County portion), Western MDAB (Los Angeles County Antelope Valley portion and San Bernardino County western portion of MDAB), and SSAB (Riverside County Coachella Valley and Imperial County portions).

Finding: The 2013 FTIP regional emissions for NO<sub>2</sub> meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in the SCAB.

Finding: The 2013 FTIP regional emissions for CO meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in SCAB.

Finding: The 2013 FTIP regional emissions for PM<sub>10</sub> and its precursors meet all applicable emission budget tests for all milestone, attainment, and planning horizon years in SCAB and the SSAB (Riverside County Coachella Valley portion).

Finding: The 2013 FTIP regional emissions for PM<sub>10</sub> meet the interim emission test (build/no-build test) for all milestone and planning horizon years for the MDAB (San Bernardino County portion excluding Searles Valley portion), Searles Valley portion of San Bernardino County, and for the SSAB (Imperial County portion).

Finding: The 2013 FTIP regional emissions analysis for PM<sub>2.5</sub> and its precursors meet the interim emission test (build/no-build test) for all milestone, attainment, and planning horizon years for the SSAB (urbanized area of Imperial County portion).

✓ **Timely Implementation of TCM Test**

Finding: The TCM project categories listed in the 1994/1997/2003/2007 Ozone SIPs for the SCAB area were given funding priority, are expected to be implemented on schedule, and, in the case of any delays, any obstacles to implementation have been or are being overcome.

Finding: The TCM strategies listed in the 1994 (as amended in 1995) Ozone SIP for the SCCAB (Ventura County) were given funding priority, are expected to be implemented on schedule, and, in the case of any delays, any obstacles to implementation have been or are being overcome.

✓ **Inter-agency Consultation and Public Involvement Test**

Finding: The 2013 FTIP complies with all federal and state requirements for interagency consultation and public involvement by following the strategies described in SCAG's Public Participation Plan (PPP) (for more information on SCAG's PPP please visit <http://scag.ca.gov/publicparticipationplan/>). In accordance with the PPP, SCAG's Transportation Conformity Working Group serves as a forum for interagency consultation.

On July 5, 2012 the Draft 2013 FTIP was released for a 30-day public review period. In addition, during the public review period, two (2) public hearings were held on the Draft 2013 FTIP on July 19th and 26th, 2012 at SCAG's Los Angeles office with video-conferencing available from SCAG Regional offices, located in Imperial, Orange, Riverside, San Bernardino, and Ventura Counties. These public hearings were noticed in numerous newspapers throughout the region. The notices were published in English, Spanish, Korean, and Chinese languages (please see Section V of this Technical Appendix or visit [http://scag.ca.gov/ftip/pdf/final/2013/Final2013FTIP\\_TA\\_Sec05.pdf](http://scag.ca.gov/ftip/pdf/final/2013/Final2013FTIP_TA_Sec05.pdf) to view these notices). The Draft 2013 FTIP was posted on the SCAG website and distributed to libraries throughout the region.

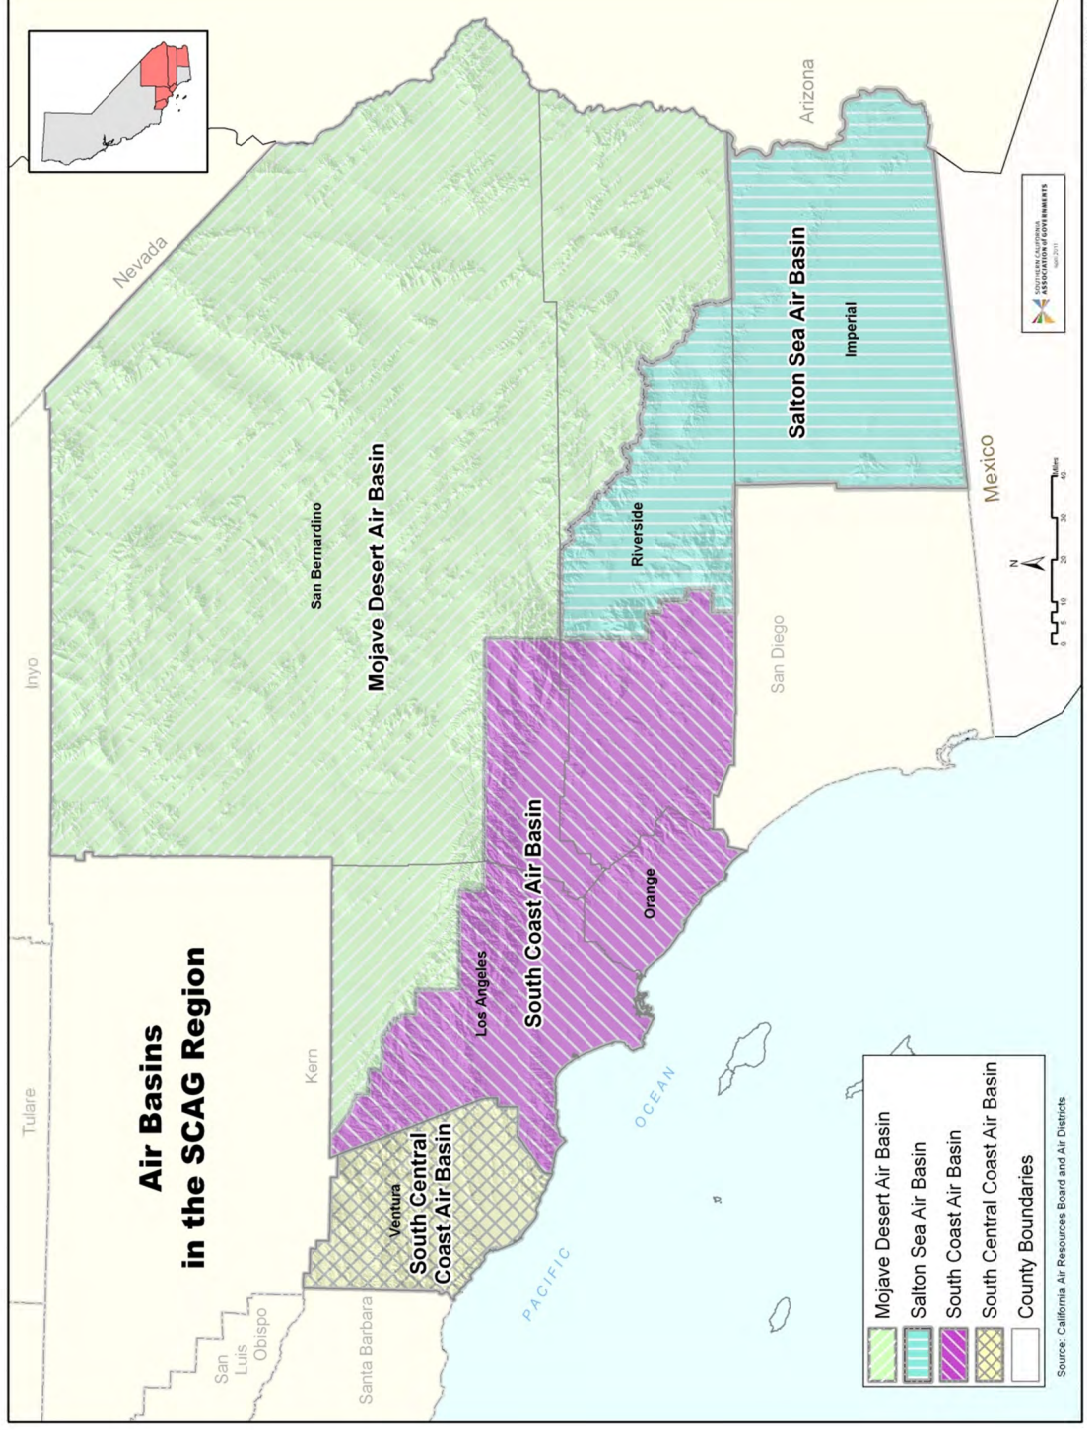

**✓ Financial Constraint Test**

Finding: The 2013 FTIP is fiscally constrained since it complies with federal financial constraint requirements under 23 U.S. Code Section 134(h) and 23 CFR Section 450.324(e). SCAG's 2013 FTIP demonstrates financial constraint in the financial plan by identifying all transportation revenues including local, state, and federal sources available to meet the region's programming totals.
